

Architecture and Administration Basics

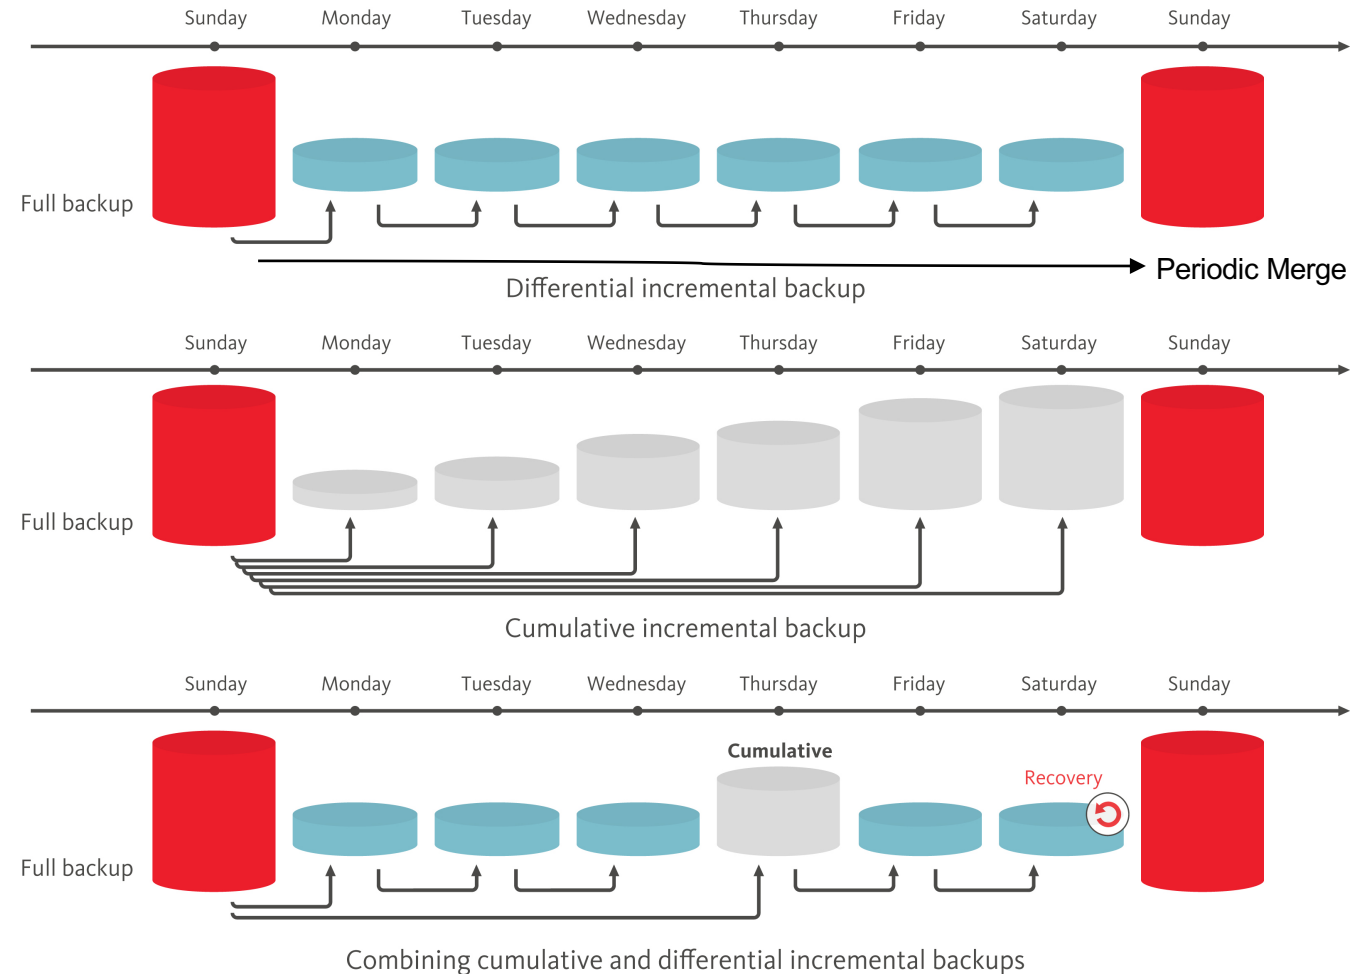

Workshop Day 1 – Backup and Restore

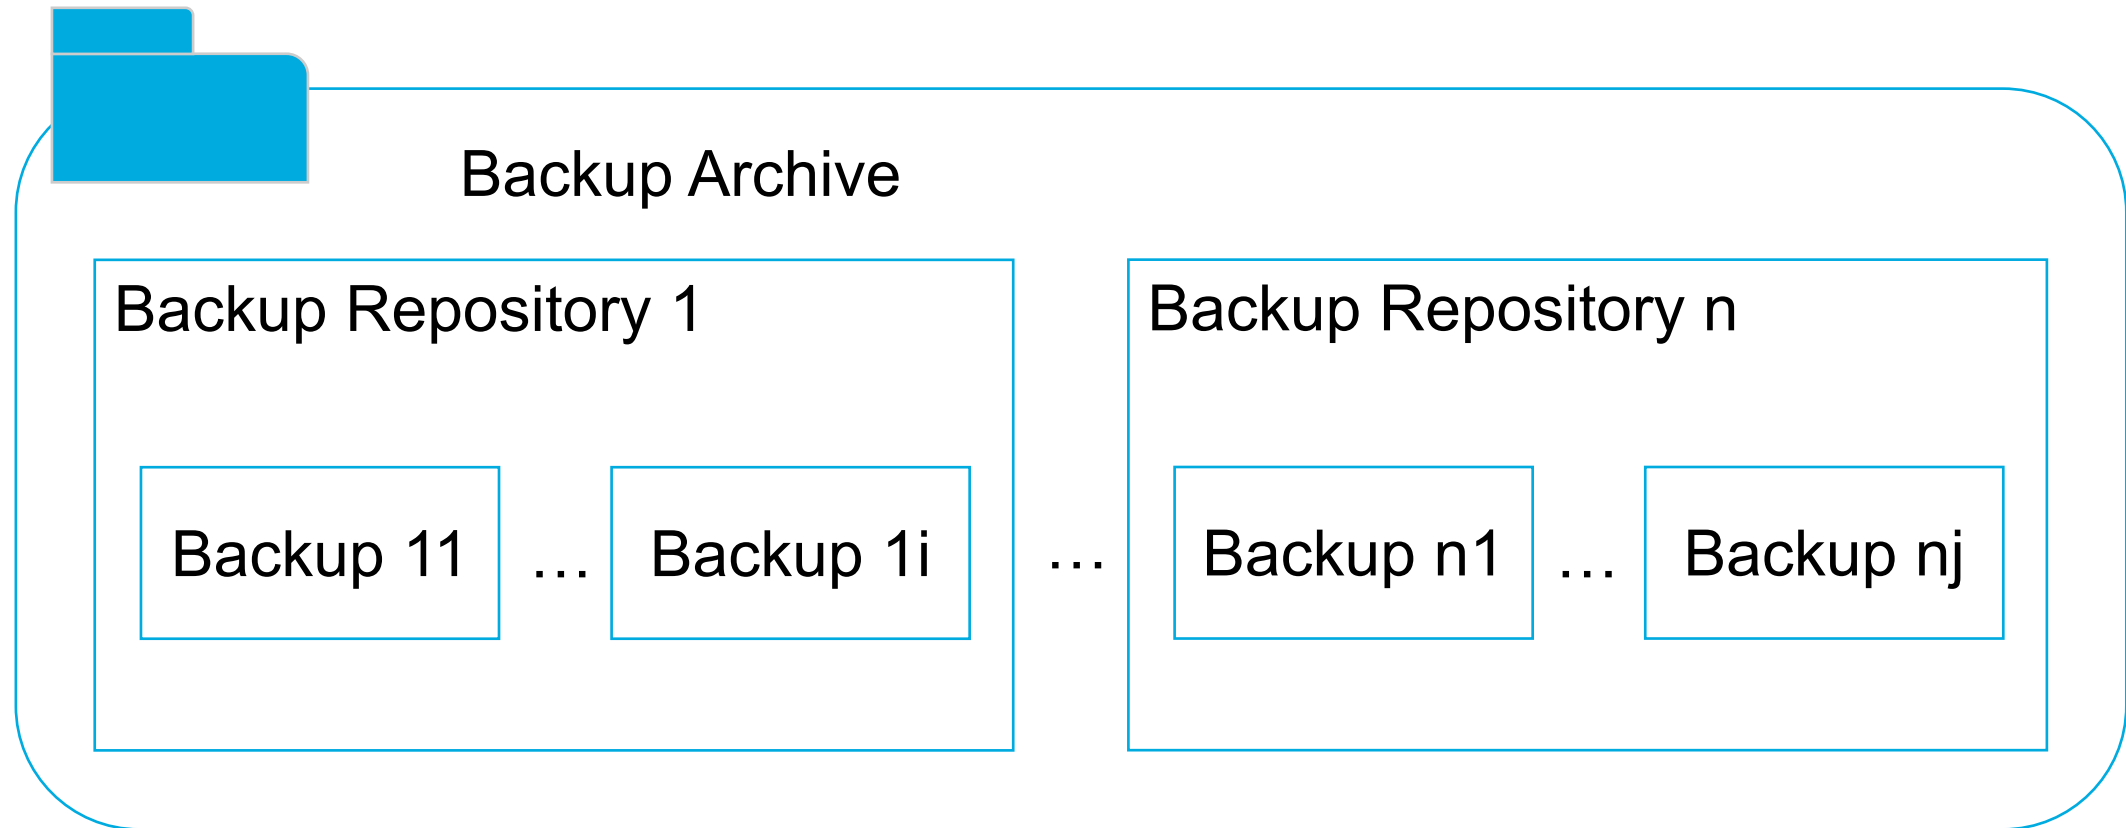

1

Backup Strategy

- **Full Backup**
 - Full Snapshot
 - Per bucket or also per node
- **Differential Incremental Backup**
 - Only changes since the last full backup
 - Created quicker
 - Takes longer to restore
 - Periodic merge
- **Cumulative Incremental Backup**
 - All changes since the last full backup
 - Takes longer than differential backups
 - Uses more disk space than differential backups
 - Faster to restore than differential backups
- **Combined**

Thank you
